

## ***Come and visit us with your students without any payment ☺***

Atatürk Primary School is the biggest, the richest and the most successful school in Afyonkarahisar, Turkey. And we are planning to put up a school from Europe with 10 students and 2 teachers in September for 6 days. When the conditions are ok, you will only take your plane tickets (return) come here and have a chance to examine Turkish National Education's face to face and e-learning systems. During the Project your accommodation, all of the meals and every of your needs will be paid by us. And we will prepare a souvenir packet for your families before you leave here too. We just want serious and successful teachers and students. And you will have a wonderful holiday either. We are planning to visit our partner in October and of course don't expect you to host us in a 5 stars Hotel as we do.

First of all both of our schools are going to form a committee and they choose the participant students (who doesn't have a chronic sickness or discipline problems) and will inform each other about them. Then the guest school will come here on the determined time and we will take them from Airport if they land in Ankara or Antalya. Here every of their needs (breakfast, lunch, dinner, accommodation, travel programmes) will be paid by us. (teachers will stay in a thermal hotel (with 5 stars which is the biggest of Europe. Enjoy it)

Here students will stay with the chosen students' home and have breakfast and dinner with their parents (we choose the families carefully, especially homes with internet to speak with their families to say that they are ok every evening if they want. The profile of those parents are businessman, lawyer, academician, doctor, director and teacher)

In the mornings they are going to follow and examine maths, science, english, art, technology and design lessons. Then we are going to have our lunches in the best restaurants of Afyonkarahisar. (everyday you are going to taste different delicious Turkish foods)

In the afternoons you are going to listen to conferences about e-learning systems in Turkey. And have trips (the thermal tourism, thermal swimming pools, the marble factories, old Afyon houses, The famous Frig Valley, Churches and Mosques )

Last day we are going to take a report about your impressions and have cocktail with the Mayor and other masters of the city. If you are interested in this smart Project or want to add something let us meet in Skype or e-twinning (my Skype nick : serkand)

### **Programme**
